SUMMARY

B.Tech student in Computer Science (Artificial Intelligence) with hands-on experience in building full-stack web applications and data-driven systems using Python, Flask, and PostgreSQL. Passionate about researching advancements in AI/ML and applying data structures to build reliable, innovative, and scalable solutions. Highly motivated to learn, improve, and build real-world software products.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence Expected Graduation: 2027

- JECRC College, Jaipur | 3rd Year | CGPA: 7.94

SKILLS

- Languages: Python, C++, SQL, HTML, CSS
- Web Technologies: REST APIs, FAST APIs , JWT Auth
- Libraries & Frameworks: Flask, React , Matplotlib, scikit-learn, NumPy, Pandas, Tailwind CSS
- Tools & Others: Git, GitHub, Render, Postman
- Database: PostgreSQL, SQLite, MongoDB , SQLAlchemy
- Core Concepts: Data Structures & Algorithms (DSA), OOPs, Basic Data Preprocessing, ML Concepts

PROJECTS

AI-Powered Personal Finance Manager 2025

Python, Flask, PostgreSQL, HTML, CSS, Pandas, Matplotlib, Machine Learning

- Built a full-stack web application to manage personal income, expenses, and monthly budgets.
- Implemented user authentication system (login and registration).
- Added CRUD operations for income, expenses, and budget management.
- Created an analytics dashboard with charts using Pandas and Matplotlib.
- Implemented AI-based expense prediction and financial health score system.
- Added export functionality to download expense data in CSV and PDF format.
- Deployed the application online using Render with PostgreSQL database.

AI Interview Platform (Smart Hiring System) 2026

FastAPI, React (Vite), PostgreSQL, SQLAlchemy, JWT, Tailwind CSS

- Developed a full-stack hiring platform to automate candidate evaluation and streamline recruitment workflows
- Implemented secure authentication using JWT with role-based access control for candidates and recruiters
- Built RESTful APIs using FastAPI and integrated PostgreSQL with SQLAlchemy ORM for scalable data management
- Designed resume upload and parsing system to extract skills and calculate skill-based scores
- Developed aptitude test module to evaluate candidates and compute test scores
- Created a dynamic scoring system combining skill score and test performance for candidate ranking
- Built recruiter dashboard to view, filter, rank, and shortlist candidates efficiently
- Developed responsive frontend using React and Tailwind CSS for seamless user experience
- Ensured modular and clean architecture with separation of routes, models, and services

ACHIEVEMENT

- Solved 350+ Data Structures & Algorithms problems on LeetCode.
- Earned 100+ Days LeetCode Streak Badge for consistent daily problem-solving.
- Successfully completed Deloitte Data Analytics Job Simulation (Forage) with hands-on experience in data analysis and forensic technology.

Training & Certifications

- Completed certified training in Programming with C and C++ from Internshala, building strong fundamentals in structured and object-oriented programming, memory management, and problem-solving.
- Completed certified training in Web Development from Codec Technologies, gaining hands-on experience in HTML, CSS, JavaScript, and backend fundamentals, and building responsive, real-world web applications.
