SUMMARY

B.Tech student in Computer Science (Artificial Intelligence) with strong skills in Python, C++, FastAPI, Flask, SQL, and PostgreSQL. Experienced in building full-stack web applications, REST APIs, and scalable backend systems with secure authentication and database integration. Solved 400+ DSA problems on LeetCode with strong problem-solving abilities. Passionate about software development, system design, and learning emerging technologies to build reliable real-world solutions.

EDUCATION

B.Tech in Computer Science and Artificial Intelligence
• JECRC College, Jaipur | 3rd Year | CGPA: 7.94

Expected Graduation: 2027

SKILLS

- Languages: Python, C++, SQL, HTML/CSS
- Backend & Web: FastAPI, Flask, RESTful APIs, JWT Authentication
- Frontend: React (Vite), Tailwind CSS
- Data Science & AI: Machine Learning, Pandas, NumPy, Scikit-Learn, Matplotlib
- Databases & ORM: PostgreSQL, MongoDB, SQLite, SQLAlchemy
- Tools & Platforms: Git, GitHub, Postman, Render
- Core Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS)

PROJECTS

AI-Interview Platform (Smart Hiring System)

2026

- FastAPI, React (Vite), PostgreSQL, SQLAlchemy, JWT, Tailwind CSS
- Built a full-stack recruitment platform to automate candidate evaluation and hiring workflows.
 - Developed REST APIs using FastAPI with PostgreSQL and SQLAlchemy for scalable data management
 - Implemented JWT authentication and role-based access control for recruiters and candidates.
 - Created resume parsing, aptitude testing, and candidate ranking features for smart shortlisting.
 - Built responsive recruiter dashboard using React and Tailwind CSS.

AI-Powered Personal Finance Manager

2025

- Python, Flask, PostgreSQL, HTML, CSS, Pandas, Matplotlib, Machine Learning
- Built a full-stack web application to manage personal income, expenses, and monthly budgets.
 - Implemented user authentication system (login and registration).
 - Added CRUD operations for income, expenses, and budget management.
 - Created an analytics dashboard with charts using Pandas and Matplotlib.
 - Implemented AI-based expense prediction and financial health score system.
 - Added export functionality to download expense data in CSV and PDF format.
 - Deployed the application online using Render with PostgreSQL database.

ACHIEVEMENT

- Solved 400+ Data Structures & Algorithms problems on LeetCode.
- Earned 100+ Days LeetCode Streak Badge for consistent daily problem-solving.
- Successfully completed Deloitte Data Analytics Job Simulation (Forage) with hands-on experience in data analysis and forensic technology.

Training & Certifications

- Earned HackerRank Python (Basic) Skill Certification demonstrating proficiency in Python fundamentals and problem-solving
- Completed certified training in Programming with C and C++ from Internshala, building strong fundamentals in structured and object-oriented programming, memory management, and problem-solving.
- Completed certified training in Web Development from Codec Technologies, gaining hands-on experience in HTML, CSS, JavaScript, and backend fundamentals, and building responsive, real-world web applications.
